

The Bollywood Project:

AI-powered Story Builder

Isn't story building just about books?

Isn't story-building supposed to be easy and fun?

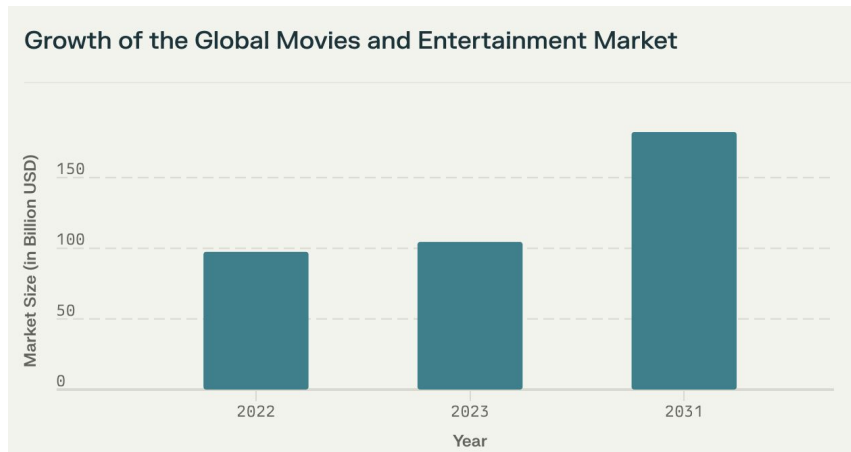

- Writer's Block
- Catering to diverse audiences
- Inconsistent Creativity
- Complexity of Narrative Design
- Time Constraints

**An assistant that handles
the hard work, so you can
focus on the fun of
storytelling!**

Business Impact

- Global Movies and Entertainment Market size is poised to grow from USD 104.49 billion in 2023 to USD 182.23 Billion by 2031.
- Faster content generation leads to more projects completed annually
- Higher quality stories increase potential box office returns
- This product can be generalised to other contexts like developing marketing videos. Developing a video that personifies the product and makes a compelling story can have a great reach.

Solution

- 5-Act Structure
 - Act 1: Exposition (setting, protagonist, supporting characters, conflict introduction, tone)
 - Act 2: Rising Action (challenges, antagonist, turning points, character development, stakes)
 - Act 3: Climax (critical decision, conflict resolution, protagonist transformation, dramatic tension)
 - Act 4: Falling Action (consequences, loose ends, antagonist outcome, protagonist reflection)
 - Act 5: Resolution (final scene, themes, protagonist's new status quo, closure)
- Multilingual support
- Text-based interaction

Tech Stack

- Frontend :
 - Hardcore UI: HTML, CSS, JS
- Backend & API :
 - Python-Flask
- AI/ML Layer :
 - OpenAI Assistants API
- Database :
 - MongoDB
